Conditions of maintaining reliability are given
over leaf.

Conditions

In order to maintain reliability coders are asked to meet the following conditions:

1. Evidence of regular coding for research or clinical/practice use.
2. Attendance at the on line seminars for CAPA coders. These are held approximately every three months.

In addition:

3. Coders using the CAPA for forensic uses such as court reports must follow the IASA guidelines. These are posted on the website.
4. Coders working in court and forensic arenas should ensure approximately 20% of their codings are submitted for reliability checks by engaging a second coder blind to the circumstances of the case.
5. Bear in mind the CAPA must not be used as proof of child maltreatment.
